Gregory P. Marchildon, Sara Allin, Sherry Merkur

Toward the Health of a Nation Leslie A. Boehm, 2020-10-22 Canadians view their healthcare - recognized throughout the world as an exemplary system - as iconic and integral to their identity. In *Toward the Health of a Nation* Leslie Boehm recounts the first seventy years in the life of one of the foundations of Canada's healthcare system, the Institute of Health Policy, Management and Evaluation at the University of Toronto. Boehm - a graduate of IHPME, and an instructor there throughout his career - charts the institute's history from its inception in 1947 as the Department of Hospital Administration to the present day. The first program of its kind in Canada, and one of the few in the world, the school was founded at a time when the issue of healthcare was becoming a significant part of national and provincial discussions and policies. Initially concentrating on hospital management and professional degrees, it has expanded to offer academic degrees and facilitate important research into health systems, policies, and outcomes. In *Toward the Health of a Nation* Boehm demonstrates the excellence of the program, its faculty, and its graduates, as well as their accomplishments in major government initiatives and royal commissions. In the seventy years since IHPME's inception healthcare has grown to become a major part of government and business activity, and it will only increase in coming years. An in-depth history of a major program in graduate health education, *Toward the Health of a Nation* highlights how important healthcare is to a modern, functional society.

Treating Health Care Raisa Deber, 2018-01-18 Canada has been among the world leaders in recognizing the multiple factors that impact health. Focusing on Canada's health care system, Raisa B. Deber provides brief descriptions of some key facts and concepts necessary to understand health care policy in Canada and place it in an international context. An accessible guide, Treating Health Care unpacks key concepts to provide informed discussions that help us understand and diagnose Canada's health care system and to clarify which proposed changes are likely to improve it - and which are not. This book provides background information to clarify such concepts as: determinants of health; how health systems are organized and financed (including international comparisons); health economics; health ethics; and roles and responsibilities of different stakeholders, including government, providers, and patients. It then addresses some key issues, including equity, efficiency, access and wait times, quality improvement and patient safety, and coverage and payment models. Using analysis rather than advocacy, Deber provides a toolkit to help understand health care and health policy.

Health Technology Assessment and Health Policy Today: A Multifaceted View of their Unstable Crossroads Juan E. del Llano-Señarís, Carlos Campillo-Artero, 2015-01-08 This book disentangles the issues in connection with the advancement of Health Technology Assessment (HTA) and its interface with health policy. It highlights the factors that should shape its progress in the near future. Interdisciplinary and critical views from a number of professionals are put together in a prescient order to cast some light and make recommendations as to the next steps HTA should take to be fit for purpose. A wealth of documents dealing with HTA have been published over the last three decades. HTA allegedly is one of the bedrocks of regulation and medical decision making. However, counter vailing visions contend that geographical variations in the role that HTA is actually playing within countries pinpoints specific room for improvement. Given our social preferences, cherry-picking HTA's features and successes over the last decades moves it away from its possibility frontier. Some of the most noteworthy hindrances that HTA faces, in several countries, to making headway towards its consolidation

as an efficient tool for regulation and decision making are as follows: insufficient resources, delays in assessment, inadequate priority setting, regulatory capture, public distrust, actual influence on regulatory decisions, the need for strengthening international cooperation and harmony, the lack of sound and consistent assessments of diagnostic tests, medical devices and surgical innovations and limited dissemination. Time has come for HTA to take a renewed stand. There is a pressing need to submit HTA to in-depth critical scrutiny.

The Role of Digital Health Policy and Leadership K. Keshavjee, A. Khatami, 2024-03-19 Digital health technologies could change the trajectory of current healthcare systems and make them more proactive. Advanced predictive technologies have now become available which make this more possible than ever before, but it will not happen without improved policies, regulations, and governance of our systems. Health informatics must operate at the macro level if it is to provide policymakers and other stakeholders with the information they need to better allocate resources and intervene more effectively. This book presents the proceedings of FHLIP, the Future of Health Leadership, Informatics, and Policy Conference, held on 22 February 2024 in Toronto, Canada. The conference aimed to catalyze the development of proactive, innovative digital-health solutions capable of addressing the ever-evolving challenges faced by the healthcare sector, and lay the groundwork for a more resilient, patient-centered healthcare ecosystem. It provided a platform for stakeholders to identify challenges, question assumptions, and better understand the roles of policymakers and vendors. The conference received a total of 26 submissions, of which 19 were selected for presentation at the conference and publication here after a thorough review process. Topics covered included interoperability and governance, regulation of electronic medical records,

addressing the needs of vulnerable populations, scaling up use of artificial intelligence and the design of health system level architectures for large scale interventions. The book looks forward to a future where digital health makes contributions beyond the provider and patient level and will be of great interest to not only those working in the field of health informatics and digital health, but also to digital leaders and policy makers interested in taking their healthcare systems From Reactive to Proactive.

Restructuring Canada's Health Systems: How Do We Get There From Here? Raisa B. Deber, Gail G.

Thompson, 1992-12-15 Is the Canadian health care system becoming a victim of its own success? It has done what it set out to do – provide universal access to all medically necessary health services without financial barriers to patients – but expanding technology, an aging population, and escalating costs strain its ability to continue. It is time to explore ways to reorient and restructure the health care system and the services it provides. At the Fourth Canadian Conference on Health Economics, contributors of international reputation addressed these concerns. Their papers, collected in this volume, consider a wide range of fundamental issues related to health care policies and structures. They discuss new developments in health care delivery, assess implications of such new policies as home care and health promotion, and propose concrete alternatives for restructuring the present system to sustain universal medicine.

Managing a Canadian Healthcare Strategy A. Scott Carson, 2017-03-16 Canada's fragmented healthcare system is one of the most expensive among the OECD countries, yet the quality of its performance is mediocre at best. Canada lacks a system-wide healthcare strategy that brings together many individual federal, provincial, and territorial strategies into a comprehensive and coherent whole. *Managing a Canadian Healthcare Strategy* is a collection of ten policy research essays by leading Canadian and international scholars who address three important questions. First, if Canada had a unifying strategy, how would the country measure its success and monitor its performance? Second, who are the agents of change to bring about a Canadian system-wide strategy? Third, how can the jurisdictional realities of Canada's political system be managed to bring about strategic reform? The final section in the volume explores ways to overcome the barriers and impediments that preoccupy Canadians' concerns about healthcare. A companion volume to *Toward a Healthcare Strategy for Canadians*, the contributors to *Managing a Canadian Healthcare Strategy* turn to the critical importance of how necessary healthcare changes can be best implemented.

Bending the Cost Curve in Health Care Gregory P. Marchildon, Livio Di Matteo, 2015-01-01 Through Canadian and international perspectives, *Bending the Cost Curve in Health Care* explores the management of growing health costs in an extraordinarily complex arena. The book moves beyond previous debates, agreeing that while efficiencies and better value for money may yet be found, more fundamental reforms to the management and delivery of health services are essential prerequisites to bending the cost curve in the long run. While there is considerable controversy over direction and details of change, there also remains the challenge of getting agreement on the values or principles that would guide the reshaping of the policies, the structures, and the regulatory environment of health care in Canada. Leading experts from around the world representing a range of disciplines and professional backgrounds come together to organize and define the problems faced by policy-makers. Case studies from the United States, the United Kingdom, Australia, the Nordic countries, and industrialized Asian countries such as Taiwan offer useful reform experiences for provincial governments in Canada. Finally,

common Canadian cost factors, such as pharmaceuticals and technology, and paying the health workforce, are explored. This book is the first volume in The Johnson-Shoyama Series on Public Policy, published by the University of Toronto Press in association with the Johnson-Shoyama Graduate School of Public Policy, an interdisciplinary centre for research, teaching, and executive training with campuses at the Universities of Regina and Saskatchewan.
